**Zetta Overview** Founded in 2008, Zetta delivers immediate, offsite data protection for enterprise data. The Zetta Storage Service enables businesses to quickly adopt storage-as-a-service, protecting and recovering their data without expensive or risky changes to information technology environments. Supporting all unstructured data types and backed by industry leading data integrity and data security technologies, Zetta's scalable performance and enterprise-availability enables enterprise storage expansions to benefit from the economies of the on-demand business model.

#### **Our Credentials**

Zetta's founders are the team who commercialized the web as leaders of Netscape. Since 2000 the Zetta team has had years of experience running 7+ petabytes of enterprise class storage at more than 99.99% SLAs. They come from companies like Equallogic, EMC, RSA, Symantec and VeriSign and are collectively responsible for some of the Internet's best known distributed computing standards including: Cookies, SSL, HTTP Proxying, and Global Load Balancing.

**Company Background** Based in Sunnyvale, California, Zetta was established in 2008 by successful serial entrepreneurs. The company has over raised \$22 million from leading venture capital firms. Zetta is backed by Sigma Partners, Foundation Capital and angel investors.

**Zetta Offerings** **Zetta Data Protect**  
Zetta Data Protect immediately and securely replicates and protects your data offsite to the Zetta Storage Service where it is stored in native file system format, accessible through standard file access protocols. No Zetta protocols or appliances are needed, allowing a rapid, cost-effective solution implementation. Restores are instantaneous with direct file-level access to your data at all times. Zetta Data Protect is provisioned in minutes, and your data can be protected offsite in just hours.

Zetta Data Protect with ZettaMirror™, built on top of the award winning Zetta Storage Service, reduces risks to your data without requiring traditional backup. Features include:

*Instant Restores* — Zetta maintains a mountable copy of your data ready for instant access directly from the Zetta data center or for rapid replication back to your location. No tapes, no data reformatting required.

*Continuous Validation* — Your data is always online and accessible for validation. Continuous data scrubbing detects and corrects any storage errors. No more failed restores!

*Geographic Preference* — Choose the Zetta data center that meets your disaster recovery objectives. Zetta offers coast-to-coast protection and can replicate your files between data centers for even more protection.

*Seven Year History* — Snapshots on the Zetta offsite data storage system allow you to restore any version of files for years past. Snapshots are user settable and by default offers seven years of history.

*Reduced Expense* — No backup storage hardware to buy or manage, with a pay-as-you-use model. No local datacenter space, power or cooling for your backup data.
